

# Science 7 Course Outline

## 2015 – Semester 2

### Teacher

Mr. Foster

Units	Duration / Time	DAY	Period	Location
1. Heat and Temperature	Semester 2	1	4	Ms. RP's
2. Mixtures and Solutions	(February to June 2014)	3	4	Ms. RP's
3. Earth's Crust and Resources	~90 classes	4	5, 6	Sci Lab
4. Interactions within Ecosystems		5	6	Ms. RP's
		6	3	Sci Lab

### Labs / Experiments

Students must follow safety precautions for any lab or experiment. Students who blatantly or repeatedly disregard safety precautions will lose lab privileges and be required to make up the missed lab work with written assignments.

### Evaluation

Units will be evaluated through activities, assignments, labs, quizzes and a unit test. Students will be given the opportunity to make corrections on unit tests.

When a class is missed, it is the **student's responsibility** to find out what was missed and discuss with the teacher the possibility to make up any work, notes or tests. Whenever possible, the school should be informed in advance of when they will be absent from class. If possible, work will be sent home for the student to do during the absence.

Heat and Temperature	20%
Mixtures and Solutions	20%
Earth's Crust and Resources	30%
Interactions within Ecosystems	30%

### Resources

#### Pearson Science 7

This is the textbook that we will be using for much of our work. It contains lessons, diagrams, experiments, glossary definitions, questions and reviews. Students are welcome to take this resource home as long as they bring it back to school to have in class each day.
